Full Stack Developer | Node.js | React | TypeScript | AI Integrations

Professional Summary

Full Stack Developer with strong backend expertise and 4+ years of experience building scalable applications and distributed systems using Node.js, TypeScript, React, and modern cloud-native architectures. Experienced in designing robust REST APIs, AI-powered platforms, enterprise integrations, and real-time systems, with hands-on expertise in backend architecture, LLM integrations, authentication flows, and scalable frontend applications. Strong background working in enterprise environments (IBM) and fast-paced product teams, delivering end-to-end solutions across frontend, backend, databases, DevOps, and AI-driven workflows. Skilled in Node.js, NestJS, React.js, TypeScript, PostgreSQL, MongoDB, Docker, Jest, and modern software engineering practices including SOLID, Clean Architecture, TDD, and Agile methodologies.

Education

- Bachelor's in Systems Analysis and Development – UNIP – 2025

Courses | Certifications

▪ Full Stack Development – Fundação Bradesco – 2021

▪ Test-Driven Development (TDD) – IBM XP Farm – 2023

Languages

English – Professional Working Proficiency | Spanish (basic) | Portuguese (native)

Professional Experience

SenseteK
Full Stack Developer (Backend Focus)
nov/2025 – Present • Hybrid

• Architected and developed AI-powered enterprise agents using Node.js, TypeScript, React, and LLM integrations in production environments.

• Designed scalable backend architectures for AI workflows, integrating OpenAI models and multi-provider LLM strategies.

• Implemented tool-calling systems enabling AI agents to securely execute backend actions and interact with corporate APIs and structured business data in real time.

• Developed scalable REST APIs and integrations with Microsoft Teams, and Slack.

• Built frontend interfaces in React.js for AI-driven workflows and operational dashboards.

• Integrated PostgreSQL, MongoDB, and enterprise data sources to enable natural language querying over corporate information.

• Applied security and governance practices for AI systems, including rate limiting, token consumption control, abuse prevention, and hallucination mitigation strategies.

• Collaborated on a real-time logistics tracking platform using Node.js and React.js, improving communication between carriers, drivers, and customers.

• Worked in Agile squads participating in architecture discussions, code reviews, testing strategies, and full SDLC processes.

• Applied Clean Architecture, SOLID principles, and scalable backend design patterns in distributed systems.

Mobiis
Junior Software Developer
Nov/2024 – Jun/2025 • Campinas, SP

• Contributed to the refactoring of a legacy React.js + TypeScript platform, improving scalability and maintainability while actively participating in business rule definition, system architecture decisions, and application prototyping.

• Supported backend integrations, REST API connections, and JWT-based authentication flows, focusing on performance, security, and reliability.

• Collaborated in Agile squads, contributing to CI/CD adoption for faster and safer deployments.

Falcon Tecnologia
Freelance Developer
Mar/2025 – May/*2025*

• Developed an **integrated POS module** for an ERP system, ensuring smooth sales workflows.

• Built CRUDs and reusable components in **React.js with TypeScript**, improving scalability.
• Validated API integrations using Postman to ensure reliable data exchange.

IBM
Full stack Developer
Jan/2023 – Nov/2024 • Hortolândia, SP

• Developed scalable backend services and REST APIs using Node.js, TypeScript, Express.js, MongoDB, and SQL databases.

• Built full stack enterprise applications using Vue.js and Node.js, integrating complex approval workflows and business rules.

• Designed and optimized MongoDB queries and backend integrations for high-volume internal systems.

• Collaborated in cloud-native and distributed application environments using CI/CD pipelines and containerized workflows.

• Participated in testing strategies using Jest, API validation with Postman, and monitoring practices for backend reliability.

• Worked closely with Agile squads in end-to-end feature delivery and software lifecycle processes.

IBM
Apprentice in Software Development
Dec/2021 – Dec/2022 • Hortolândia, SP

• Learned programming logic, **Git/GitHub workflows**, and agile methods (Scrum/Kanban).

• Developed simple web pages using **HTML, CSS, and JavaScript**, building a strong foundation for backend development.

Technical Skills

Frontend

• React.js, Vue.js (Composition API), TypeScript, JavaScript (ES6+), HTML5, CSS3, TailwindCSS

Backend

• Node.js, NestJS, Express.js, REST APIs, TypeScript, JavaScript

Databases

• PostgreSQL, MongoDB, SQL Server, Redis (basic)

Architecture & Engineering

• Clean Architecture, SOLID, DDD, TDD, RESTful APIs, Distributed Systems, JWT Authentication, OAuth2 Flows, AI Agents, LLM Integrations, Tool Calling

Cloud & DevOps

• Docker, Git, CI/CD Pipelines, IBM Cloud, AWS (basic)

Testing

• Jest, Cypress, Postman

Methodologies

• Agile/Scrum, Kanban
